

## FY23 BroadbandUSA Federal Funding Site Update

**Department:** Federal Communications Commission

1	<b>Federal Agency/Bureau</b>	Federal Communications Commission/Wireline Competition Bureau
2	<b>Program Name</b>	Rural Health Care Program
3	<b>Authorizing Legislation</b>	47 U.S.C.§ 254(h)(1)(a) - Telecom; 47 U.S.C.§ 254(h)(2)(a) - Healthcare Connect
4	<b>Program Overview</b>	<p>The Rural Health Care (RHC) Program provides funding to eligible public or non-profit health care providers for broadband and telecommunications services necessary for the provision of health care. RHC Program support is provided on a funding year basis. The RHC Program has an annual funding cap, which is adjusted for inflation each year. The cap for funding year 2023 is \$682.4 million. The RHC Program provides funding through two programs: the Telecommunications (Telecom) Program and the Healthcare Connect Fund Program. The Telecom Program, established in 1997, seeks to ensure that rural health care providers pay no more than their urban counterparts for eligible telecommunications services. Specifically, an applicant's program support is based on the difference between rural rates charged for telecommunications services in the rural area where the health care provider is located, and the urban rates charged for similar telecommunications services in the State. The rural health care provider pays only the urban rate for the telecommunications service, and the USF pays the difference between the urban rate and rural rate for the service to the service provider. The Healthcare Connect Fund Program, established in 2012, provides a flat 65% discount on an array of communications services to both individual rural health care providers and consortia, which can include non-rural health care providers (if the consortium has a majority of rural sites). These services include Internet access, dark fiber leases, business data, traditional DSL, and private carriage services, among others, along with funding for construction of health care provider-owned communications facilities. With the Healthcare Connect Fund Program, the Commission intended to promote the use of broadband services, recognizing the increasing need for rural health care providers to have access to specialists who are often located in urban areas, as well as the advent of certain communications-based trends in healthcare delivery, such as the move towards electronic health records.</p>
