Note: Form instructions and definitions will be created to support the report. Instructional guidance and training will be developed. Numbering to be updated based on final approved form.

RECIPIENT NAME	ZAYO GROUP LLC	**OMB Control No.**	OMB Control No. 0660-0052
		Expiration Date	Exp. Date: 2/28/2027

Middle Mile Grant Program Bi-Annual Performance Report								
A. GENERAL INFORMATION								
1a. Recipient Organization:	ZAYO GROUP LLC	**1h. Award Identification Number:**	08-40-MM217					
1b. Recipient Street Address:	1401 Wynkoop St Ste 500	**1i. Report Date (MM/DD/YYYY):**	12/31/2025					
1c. City, State, and Zip Code:	Denver, Colorado 80202-1729	**1j. Final Report:**	**Yes**		**No**	X		
1d. Unique Entity Identification (UEI) Number:	EACWBKJV6636	**1k. Report Period Start Date (MM/DD/YYYY):**	04/01/2025					
1e. Award Start Date (MM/DD/YYYY):	07/01/2023	**1l. Report Period End Date (MM/DD/YYYY):**	09/30/2025					
1f. Award End Date (MM/DD/YYYY):	12/31/2026							
1g. Name of Person Completing Report:	Mayank Goel							
B. PROJECT NARRATIVE								
Please use the section below to provide a project narrative of the project(s). This section aims to help reviewers better understand what project is being proposed and steps taken to achieve this goal.								
2a. A brief description of the recipient's organization and scope of work/project priorities.	Founded in 2007, Zayo Group, LLC is the leading independent provider of fiber communications infrastructure in North America. Zayo has over 3,400 employees and delivers an unmatched network that covers 133,000 fiber route miles and 15 million miles of fiber, serving 44,000 one-net buildings, 1,400 on-net data centers, and over 370 cloud on-ramps. The purpose of this project is to provide a unique middle mile fiber network that will serve rural areas that currently have inadequate broadband services. Our network will provide the necessary backbone to deliver broadband to these communities. For many of these communities, the lack of a reliable fiber middle mile network has been the main inhibitor of access to broadband services. The benefits of this project							

	will be profound for these communities. The availability of robust broadband will make possible remote educational opportunities, telemedicine, and reliable public safety communications. The purpose of this project proposal is to construct a new, 649-mile underground middle mile fiber route that would serve some of the most rural areas in Western Texas, stretching from Dallas to El Paso. It will facilitate broadband service to several unserved and underserved areas. The network has been designed to include 28 access points that can serve 401 community anchor institutions. Additionally, Zayo is partnering with Vertical Bridge, another service provider, to construct middle mile infrastructure in the form of 180-foot towers that can host up to four last mile wireless Internet Service Providers that will provide fixed and mobile 5G wireless broadband. The cell tower infrastructure enables fixed wireless broadband as well as expanding mobile 5G broadband. Vertical Bridge will contruct nine towers along the route. The proposed rescoping to include a Middle Mile Digital Expansion Access Network ("DEAN") aims to connect last-mile Internet Service Providers in rural areas to more communities at lower costs (similar to metro area pricing) and support 28 access points. Zayo will provide dedicated fibers and install lit services equipment at Intermediate Line Amplifiers (ILAs) to support this network. This allows ISPs to interconnect at handholds and splice points along the Middle Mile route without requiring costly fiber pairs for backhaul to Tier 1 or Tier 2 Point of Presence (PoPs). This approach simplifies expansion into unserved and underserved areas as demand grows, promoting equitable connectivity.
2b. An overview of the significant outputs and outcomes to be accomplished in the project.	The final outcome of this project is to provide a unique middle mile fiber network that will serve rural areas that currently have inadequate broadband services. Zayo's network will provide the necessary backbone to deliver broadband to these communities. For many of these communities, the lack of a reliable fiber middle mile network has been the main inhibitor of access to broadband services. Zayo is working towards this outcome during this reporting period. A major output during this reporting period includes, the design of and proposed inclusion of the Rural Access Network.
2c. How would the project meet the recipient's business and/or administrative need(s)?	Zayo is committed to reducing the cost of bringing high-speed internet to unserved and underserved communities and help bridge the digital divide. Zayo accomplishes this goal through strategic partnerships with Vertical Bridge, Education Networks of America (ENA@Zayo) and other leading network providers. Zayo has a created a Government Stimulus Prorams team to apply for, secure, and manage the implementation of government grant opportunities. The NTIA MMGP award furthers Zayo's commitment to be part of the solution in unserved and underserved communities across the United States. This project is major milestone in Zayo's commitment to support nationwide initiatives to bridge the digital divide and enhance network infrastructure.
2d. Provide an overview of key accomplishments achieved for this reporting period on the MM infrastructure project.	Zayo has achieved the following key accomplishments during this reporting period: 1. Zayo received NEPA CATEX certification 2. The East and West engineering phases are complete, with final adjustments pending Texas Department of Transportation right-of-way updates for Orla; the East Texas Historical Commission survey is 100% completed with analysis. 3. Construction began on 04/22/25 in Patricia and near ILA 8, marking the start of field activities for this segment. 4.Most key permits are in place, including 10 of 11 Texas Department of Transportation permits and all Union Pacific Railroad permits; additional Union Pacific Railroad and Texas-New Mexico Railway applications are in progress. 5. Coordination with agencies continues, with the Tarrant Regional Water District in receipt of all documents, the Texas General Land Office countersignature pending, and Intermediate Long-Haul Amplifier site number 3 requiring resolution on termination language to maintain schedule. 6. Completion of 3 towers.
2e. Provide any roadblock experienced during this reporting period impacting the expansion of the MM infrastructure project (i.e., supply chain, availability of labor).	Zayo has not experienced any major roadblocks during this reporting period
2f. Provide any barriers to improving job quality experienced during this reporting period.	None to report.

C. INFRASTRUCTURE MILESTONE CATEGORIES AND PROJECT TIMELINE

Please use the chart below to provide the start date and end date of your project.

OVERALL PROJECT	PROJECT DURATION	3a. PROJECT START DATE	3b. PROJECT END DATE
	1279	07/01/2023	12/31/2026

Please provide the start and end dates for each milestone category of your project. The duration is be based on the start and end dates of each category.

Please use the table provided to indicate your EXPECTED percentage of completion on a bi-annual basis for each year of your project. Year 1 begins with your award start date.

The percentage of completion should be based primarily on the expenditure of your project budget and should be reported cumulatively from award inception through the end of each semi-annual reporting period. For example, if you expect to complete a particular milestone within the first three periods of your project, the third period and all subsequent periods should state 100%.

*** Period 1 ends September 30 and Period 2 ends March 31.

Please write “0” in the duration field if your project does not include an activity. If necessary, please insert additional milestones at the end.

6a. Miscellaneous	$0.00	$0.00	$0.00	$0.00	$0.00	$0.00	N/A
6a. Subtotal	$51,352,425.00	$34,234,950.00	$85,587,375.00	$6,156,786.17	$4,104,524.79	$10,261,310.96	12%
6a. Contingencies	$3,780,000.00	$2,520,000.00	$6,300,000.00	$0.00	$0.00	$0.00	0%
6a. Totals	$55,132,425.00	$36,754,950.00	$91,887,375.00	$6,156,786.17	$4,104,524.79	$10,261,310.96	11%

E. COMMUNITY BENEFIT AGREEMENT	
As stated in the MM Grant Program NOFO a Community Benefit Agreement (CBA) is an agreement signed by community benefit groups and a developer, identifying the community benefits a developer agrees to deliver, in return for community support of the project. Please use the fields below to state the Community Benefit Group and Developer Name and describe the activities in how this partnership has supported with the Middle Mile Infrastructure project (i.e. wage agreements, targeting hiring of apprentices and disadvantaged groups in labor marker, education and training opportunities, sub-contracting to local small business for construction, services, and supply chain needs).	
Description of Community Agreement	
7a. Community Benefit Group Name: Please provide the name of the Community Benefit Group	These questions were answered via file upload. **Number of Community Agreements:** 0 **File(s) Uploaded with Responses:** 10.20.25 bi-annual Community Benefit Agreement.xlsx
7b. Developer Name: Please provide the name of the Developer.	
7c. Community Benefit Group and Developer Partnership: Please describe in the space below the nature of the partnership and how the MM grant funds being used are assisting to provide community support for the infrastructure project.	

F. CLIMATE RESILIENCE
Recipients must demonstrate that they have sufficiently accounted for current and future weather and climate related risks to new MM infrastructure projects. At present, weather and climate related risks to broadband networks include wildfires, extreme heat and cold, inland and coastal flooding, and the extreme winds produced by weather events such as tornadoes, hurricanes, and other weather events. Because retrofitted and new infrastructure for broadband might be expected to have a lifetime of 20 years or more, recipients must account not only for current risks but also for how the frequency, severity, and nature of these extreme events may plausibly evolve as our climate continues to change over the coming decades.
Climate Resiliency Risk Mitigation
This purpose of this section is for the recipient to demonstrate that they have sufficiently accounted for current and future weather and climate-related risks to new MM infrastructure projects. In particular, each recipient should demonstrate how they've addressed the known and identifiable risks of current and future projected weather and climate conditions through measures such as (but not limited to) choice of a technology platform suitable to the climate risk of the region, reliance on alternatives siting of facilities (i.e., underground construction where appropriate), retrofitting, or hardening of existing assets, and use of network redundancy to safeguard against threats to infrastructure.
8a. Were any geographic areas identified for this reporting period subject to an initial and/or updated hazard screening for future weather and climate related risk? If so, please provide the date of the screening and provide related documentation as an attachment to this report.

No

8b. Climate Resilience Category	8c. Date of Most Recent Hazard Screening	8d. Name and Title of Representative Completing Most Recent Hazard Screening	8e. Date of Report Completion

Files Uploaded for Hazard Screening Information: Climate Resilience DAL_ELP 10.22.25.xlsx

8f. Identified Risk: For your MM project, what are the potential weather and climate hazards that may be most important to be addressed that could impact the resiliency of the middle mile infrastructure deployed (i.e. wildfires, extreme heat and cold, inland and coastal flooding, extreme winds: tornadoes, hurricanes and other weather events)?

There were no significant climate or weather hazards during this reporting period. Zayo's Network Operations Center (NOC) monitors all weather events in and around Zayo infrastructure utilizing the latest NOAA/National Weather Service Live update feeds. Zayo also utilizes GE Smallworld interactive maps/tools for all of the owned infrastructure.

8g. Weather and Climate Hazards: Were any significant climate or weather hazards experienced during this reporting period (i.e., floods, tornados) impacting infrastructure buildout or service? Briefly describe how you monitored for weather and climate caused issues for the reliability of the system. If so, please provide the date of the disaster, location and backup documentation related (i.e., news articles).

No

Zayo's NOC (Network Operations Center) in Tulsa, OK, assists our Outside Plant (OSP) Teams, contractors and vendors throughout the construction phases by identifying and highlighting any potential climate events that could potentially affect the project. Additionally, Zayo monitors its network to identify repeating occurrences such as outages on the network. Zayo also uses big data with AI technology for trend analysis to recognize location(s) repeatedly on system outage tickets.
Additionally, Zayo has Standard Operating Procedures (SOPs) that mitigate all weather and climate risks including those already identified. The SOPs include: 1. Bury the majority of the fiber. Buried fiber is the best protection against any severe climate event, particularly those identified as weather and climate risks along this route. More than 98% of the fiber is buried at a design specification of three feet. 2. Deploy high-density polyethylene (HDPE) conduit. Zayo’s design includes use of HDPE conduit which protects fiber from chemical erosion and provides protection from primary and secondary climate risks (floods, fires, winds, severe weather, and earthquakes). 3. Deploy hardened above ground telecom shelters with back-up power. Zayo’s hardened above ground infrastructure shelters consist of precast, lightweight reinforced concrete enclosures that are fire resistant, as well as insulated from extreme temperatures. The shelters are designed with onsite power sources and back-up power. Each shelter is designed with four-hour battery backup and 24-hour generator back-up. Investment in an environmental study. Zayo has also invested in and completed an environmental study which optimized the route against climate hazards protections (designing the safest route path) verified by 3rd party engineering firms. By investing in and completing an environmental study Zayo is able to avoid potential weather- and climate-related risks through the intentional path of the route.

8h. Risks to Deployment of New Infrastructure: Has the team identified any risks impacting the deployment of new or repaired infrastructure due to current and future weather and climate-related threats during this reporting period?

No

8i. Risk Mitigation: How will the project avoid and/or mitigate the risk identified? If not applicable, please explain why.

"Zayo's NOC (Network Operations Center) in Tulsa, OK, assists our Outside Plant (OSP) Teams, contractors and vendors throughout the construction phases by identifying and highlighting any potential climate events that could potentially affect the project. Additionally, Zayo monitors its network to identify repeating occurrences such as outages on the network. Zayo also uses big data with AI technology for trend analysis to recognize location(s) repeatedly on system outage tickets.
Additionally, Zayo has Standard Operating Procedures (SOPs) that mitigate all weather and climate risks including those already identified. The SOPs include: 1. Bury the majority of the fiber. Buried fiber is the best protection against any severe climate event, particularly those identified as weather and climate risks along this route. More than 98% of the fiber is buried at a design specification of three feet. 2. Deploy high-density polyethylene (HDPE) conduit. By investing in and completing an environmental study Zayo is able to avoid potential weather- and climate-related risks through the intentional path of the route.

8j. Additional Information: Is there any additional information you would like to share during this reporting period that the grant team should be aware of regarding the management of sustainable climate resiliency for your MM project?

No additional information to share.

8k. Additional Resources
Has the team utilized the available resources to assist with mitigation and long-term planning efforts for this reporting period? If so, which resources?
2018 National Climate Assessment
NOAA's 2022 State Climate Summaries
NOAA Disaster and Risk Mapping Tool
NOAA's Storms Event Database
NOAA Climate Explorer and Digital Coast
FEMA National Risk Index
Consulted FEMA-approved Hazard Mitigation Plans prepared by states in which they propose to build middle mile infrastructure to help identify key risk and hazards

Yes

Yes, the Zayo team has utilized all of these key underlying data sources to derive our analytics and forecasting.

G. Workforce

For projects receiving over $5,000,000 (based on expected total cost), as determined by the U.S. Secretary of Labor by subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act"), all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing.

Davis-Bacon Certification

9a. Does the recipient have access to the information requested (all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing?)	Yes

Local Hire Prioritization and Impact

Local hiring is a goal or requirement to hire people who live close to the place of work. This aim is often more specifically structured as a requirement for contractors awarded certain types of publicly funded projects to recruit a certain proportion of the people working on the project from a particular area. Please **provide all direct hires and contractors supporting** the MM Infrastructure project.

Please use the table below to describe how the project prioritizes local hiring.

Hires by Race, Ethnicity and Sex	Number of Hires				
	Race/Ethnicity				
	9b. Hispanic or Latino	9c. Non-Hispanic/Non-Latino			Totals
		9c-1. Men	9c-2. Women		

	9b-1. Men	9b-2. Women		White	Black or African American	Native Hawaiian or Pacific Islander	Asian	Native American or Alaska Native	Two or More Races	White	Black or African American	Native Hawaiian or Pacific Islander	Asian	Native American or Alaska Native	Two or More Races							
Number of Local Direct Hires	7	3		28	0	0	0	0	3	22	0	0	0	0	0							63
Number of Non-Local Direct Hires	6	1		13	0	0	0	0	0	6	0	0	1	0	1							28
Percentage of Local Direct Hires on Award	54%	75%		68%	0%	0%	0%	0%	100%	79%	0%	0%	0%	0%	0%							
Number of Local Subcontractors	17	1		7	1	0	0	0	0	5	0	1	0	0	0							32
Number of Non-Local Subcontractors	20	0		2	0	0	0	0	0	1	0	0	0	0	0							23
Percentage of Local Subcontractors on Award	46%	100%		78%	100%	0%	0%	0%	0%	83%	0%	100%	0%	0%	0%							

Davis-Bacon Act Wages

Please confirm if wages are at least prevailing*	
*As stated in the MM NOFO as determined by the U.S. Secretary Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act"), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the State (or the District of Columbia) in which the work is to be performed.	
10a. Are wage rates at least the Davis-Bacon prevailing wage for all laborers?	Yes
10b. Please cite your source of how this information was gathered (for 10a).	LCP Tracker Certified Payroll reports. During this reporting period, prevailing wage was paid to contractors however certifications were not approved until after this reporting period. Sub recipient, Vertical Bridge, is not subject to Davis Bacon Wage requirements. Please see wage reports uploaded in 10e.
10c. Are wage rates at least the prevailing wage for all mechanics?	Yes
10d. Please cite your source of how this information was gathered (for 10c).	LCP Tracker Certified Payroll reports. During this reporting period, prevailing wage was paid to contractors however certifications were not approved until after this reporting period. Sub recipient, Vertical Bridge, is not subject to Davis Bacon Wage requirements. Please see wage reports uploaded in 10e.
10e. If you answered "No" to either 10a. or 10c., please provide an attachment reporting the wages and benefits of workers on the project by job classification, and whether those wages are less than the prevailing wage.	NTIAprevailing.pdf, Updated NTIA Prevailing Wage Document.pdf

Workforce Demographic Data		
Jobs by Race, Ethnicity and Sex	**Number of Jobs**	
	Race/Ethnicity	

Workforce Demographic Data																					
	11-a. Hispanic or Latino			11b. Non-Hispanic/Non-Latino																	Totals
				11b-1. Men						11b-2. Women											
	11a-1. Men	11a-2. Women		White	Black or African American	Native Hawaiian or Pacific Islander	Asian	Native American or Alaska Native	Two or More Races	White	Black or African American	Native Hawaiian or Pacific Islander	Asian	Native American or Alaska Native	Two or More Races						
Jobs Created	3	1		14	0	0	0	0	0	9	0	0	1	0	1						29
Jobs Retained	48	5		64	3	0	0	0	3	31	0	0	0	0	0						154

Unionized Workforce	
12-a. Does this project include some workforce elements that are unionized?	No
12-b. Are workers provided access to union educators/organizers on employer property or during the work day?	No
12-c. Does your MM project utilize a project labor agreement?	No
12-d. Did workers receive additional information or training about their workplace rights in addition to already required notice postings?	Yes

H. Workforce Continuity Plan **National Labor Relations Act (29 U.S.C. 158 (f)**
As stated in the MM NOFO, if a recipient has not provided a certification that a project either will use a unionized project workforce or included a project labor agreement, meaning a pre-hire collective bargaining agreement consistent with section 8(f) of the National Labor Relations Act (29 U.S.C. 158 (f)), then the recipient must provide a project workforce continuity plan.
Workforce Continuity Plan
13a. Please describe the steps taken to ensure the project has ready access to a sufficient supply of appropriately skilled and unskilled labor to ensure construction is completed skillfully throughout the project's life (as required in Section III.B of the MM NOFO). As stated in the MM NOFO, the middle mile grant recipient is capable of carrying out the proposed project in a competent manner, including a plan to attract or retain an appropriate skilled and credentialed workforce.
Zayo is committed to cultivating a high-performing and collaborative work environment where all employees are supported in achieving their professional goals. Our success begins with the active involvement of our Board of Directors and leadership team, who ensure our workforce strategies align with the company's long-term goals.
For your MM project, please provide a brief description of efforts made to attract, train or retain a skilled and credentialed workforce.
Zayo engages with local organizations and workforce development partners to attract and retain highly qualified candidates who can contribute to our future growth
Has the team offered any of the following resources to assist with maintaining a sufficient supply of appropriately skilled labor force for this reporting period? If so, which resources (please provide a brief description of any of the following that apply): Professional Certifications In-House Training Registered Apprenticeships Labor-Management Partnerships Partnerships with entities like unions, community colleges, or community-based groups
Zayo offers an internship and apprenticeship program designed to develop local talent in alignment with our business needs. We conduct regular in-house training and support employees in pursuing professional certifications relevant to their roles. Our tuition reimbursement program allows employees to choose additional training, certifications, or college coursework to enhance their expertise and career development.
13b. Please describe below, the steps taken to minimize risks of labor disputes and disruptions that would jeopardize the timeliness and cost-effectiveness of completing the MM project.
"Zayo maintains a Code of Conduct, Employee Handbook, and an Outside Plant Manual that every contractor and subcontractor is required to follow which includes specific safety and wage requirements under these statues. These manuals detail equal employment opportunity requirements, pay scales, overtime eligibility, employee benefits, and worker safety requirements. Also, the Code of Conduct explicitly states that Zayo retains the right to monitor and ensure compliance with each contractor and subcontractor. Zayo considers occupational health and safety to be of primary importance. Zayo is committed to providing a safe and healthy work environment for employees, customers, contractors and visitors. All the Master Construction Services Agreements with construction contractors require them to comply with our OSP Manual, Code of Conduct, and Safety Requirements and all employment and safety laws. We ensure a safe work environment by effective administration, education and training in compliance with legal requirements and industry standards concerning workplace safety. Each employee is expected to obey safety rules and to exercise caution in all work activities. Employees must immediately report any unsafe condition to their immediate manager. For ongoing maintenance, our local team of field operations professionals work hand in hand with local groups.

All Zayo contractors must comply with all applicable laws and regulations regarding, among other things, environmental matters, occupational health and safety, labor and employment practices, human rights, immigration, anti-corruption, privacy protection, product safety, shipping and product labeling. Each contractor must provide employees with all safety equipment required by OSHA, Zayo, and the various governing agencies."

13c. Please describe below the steps to ensure a safe and healthy workplace that avoids delays and costs associated with workplace illnesses, injuries, and fatalities.

All protection equipment will satisfy the appropriate OSHA, ANSI, and/or MIOSH standards. All personnel working on-site will be certified as having completed a course in safety training. OSHA regulations require that precautions be observed to avoid cave-ins when digging boring pits and trenches, especially under wet soil conditions. This is a matter of law and safety. All contractors are required to abide by applicable regulations of the OSHA Act of 1970 and any subsequent revisions. Each contractor must provide employees with all safety equipment required by OSHA, Zayo, and the various governing agencies. Questions regarding compliance with the various regulating agencies will be the responsibility of the Safety Director of each contact company.

13d. For your MM project, please provide a brief description below of efforts made to ensure a safe and healthy workplace.

"Safety Training -
All protection equipment will satisfy the appropriate OSHA, ANSI, and/or MIOSH standards. All personnel working on-site will be certified as having completed a course in safety training. OSHA regulations require that precautions be observed to avoid cave-ins when digging boring pits and trenches, especially under wet soil conditions. This is a matter of law and safety. All contractors are required to abide by applicable regulations of the OSHA Act of 1970 and any subsequent revisions. Each contractor must provide employees with all safety equipment required by OSHA, Zayo, and the various governing agencies. Questions regarding compliance with the various regulating agencies will be the responsibility of the Safety Director of each contact company.

Certifications -
Contractors involved with the Middle Mile job includes: Plant Workers, Plant Engineers, Fiber Splicers, traffic controllers, and site supervisors. After awarding the work, Zayo can support further information on size of workforce selected, entity selected, and information on professional certification to ensure work is done on high standard. Any contractor must be trained in compliance with the before mentioned local, state, and federal regulations. The latest editions of the following codes and regulations define the minimum safety and construction standards required by Zayo: National Electrical Safety Code (NESC), National Electrical Manufacturers Association (NEMA), Code of Federal Regulations, Title 29, Occupational Safety and Health Standards (OSHA), National Electrical Code (NPFA No. 70), Underwriters Laboratories, Inc., Lightning Protection Code (ANSI-5.1), Applicable Local, State, and County Ordinances, Applicable Safety Codes Required from Right-Of Way Vendors (e.g., Highway, DOT, Railroad, etc.), RBOC and other operating companies Regulations and Requirements

Workforce committes and resolutions -
There have been no issues or concerns rasied during this reporting period. "

Has the team offered any of the following resources to assist with maintaining a safe and healthy workplace for this reporting period? If so, which resources (please provide a brief description of any of the following that apply):
Safety Training
Certifications and/or Licensure Requirements for all relevant works (e.g., OSHA 10, OSHA 30, confined space, traffic control, or other training required of workers employed by contractors)
Issues raised by workplace safety committees and their resolutions

Yes Zayo offers all of the resources above

Subcontracted Entities Information

As stated in the MM NOFO, if a recipient has not provided a certification that a project either will use a unionized project workforce or included a project labor agreement, meaning a pre-hire collective bargaining agreement consistent with section 8(f) of the National Labor Relations Act (29 U.S.C. 158 (f)), then the recipient must provide a project workforce continuity plan.

13e. Please provide the name(s) below of any subcontracted entities performing work on the project, and the total number of workers employed by each entity.

13e-1. Name of Subcontracted Entity Performing Work	Status	13e-2. Total Number of Workers within this Subcontract	13e-3. Job Categories of Workers Supporting Project within this Subcontract
Vertical Bridge - Sub recipient not Subcontractor	Active	6	Sub-recipient (Towers)
E-Copernicus	Active	3	Project Management
Stantec	Active	12	Route planning and network design
HP Communications	Active	12	Environmental Consulting
ADB	Active	19	Design engineering and construction
NA	Inactive	0	NA
Five Nine Design	Active	10	Design engineering

13f. Please describe below the steps taken to ensure that workers on the project receive wages and benefits sufficient to secure an appropriately skilled workforce in the context of the local and regional labor market.

To ensure an appropriately skilled workforce, qualified vendors must participate in Zayo's strict procurement selection process that includes multiple rounds of written and verbal evaluation. For this project we have selected Robins Construction company who is currently employing majority works from local and regional labor markets. Zayo uses LCP Tracker, a certified payroll compliance tool commonly used among States and Municipalities, to capture vendor wage, job classification, prevailing wages and fringe benefit information. The Zayo OSP team approves the certified payrolls based on their knowledge of the project.

I. ANCHOR INSTITUTIONS

Please provide Anchor Institution (AI) data for the current period only (not cumulative). Please add rows as needed.

14a. Anchor Institution Name	These questions were answered via file upload. **File Uploaded with Responses:** 10.30.25 bi-annual Anchor Institutions.xlsx
14b. Street Address	

14c. City	
14d. State	
14e. Type of Anchor Institution	
14f. Interconnection with 1,000 Feet of AI Enabling Gig Symmetrical Service	
14g. Narrative Description of how the Anchor Institution may benefit from the Grant Funded Infrastructure	

J. BROADBAND ACCESS KEY INDICATOR: SUBSCRIBERS AND SPEED

Please use the following table to provide anticipated key indicators with the projected totals for each beneficiary category, access type and speed category for your infrastructure service or project. Except as indicated, information should be reported cumulatively from award inception through the end of the bi-annual period for Bi-Annual Indicators. Please write the number “0” if your project does not include this indicator.

*** Period 1 ends September 30 and Period 2 ends March 31.

PROJECTED NUMBER OF SUBSCRIBERS AND SPEED	Year 1		Year 2		Year 3		Year 4		Year 5	
ACCESS TYPE	**Period 1**	**Period 2**	**Period 1**	**Period 2**	**Period 1**	**Period 2**	**Period 1**	**Period 2**	**Period 1**	**Period 2**
